# BETTER DECISIONS WITH PRECISE FORECASTS

## WEATHER COCKPIT

## HIGH-PRECISION METEOROLOGY

Founded in 2004, UBIMET has been setting new standards in global high-precision meteorology ever since. The shareholder structure – with Red Bull as shareholder along with two private foundations – guarantees stability. Its own department for research and development and specially trained meteorologists have been delivering expertise and innovation for over 10 years. With several million recipients, we are the market leader in severe weather warnings.

# THE RIGHT DECISIONS WITH PRECISE WEATHER FORECASTS

Increase the efficiency of your company and lower your costs, no matter what industry you are in, with the UBIMET Weather Cockpit:

SHOULD WE OPEN OUR  
OUTDOOR DINING AREA  
THIS WEEKEND?

HOW MUCH STAFF DO  
I NEED NEXT WEEK AT  
THE CONSTRUCTION  
SITE?

WILL IT SNOW  
TONIGHT?

CAN WE BEGIN  
WITH THE HARVEST  
ON MONDAY?

CAN WE DELIVER  
TOMORROW WITHOUT  
ENCOUNTERING  
ANY PROBLEMS?

## INCREASED EFFICIENCY

- Quick and reliable decision-making
- Ability to react rapidly to changes in weather conditions

## REDUCE COSTS

- Efficient usage of equipment and staff
- Prevent damage

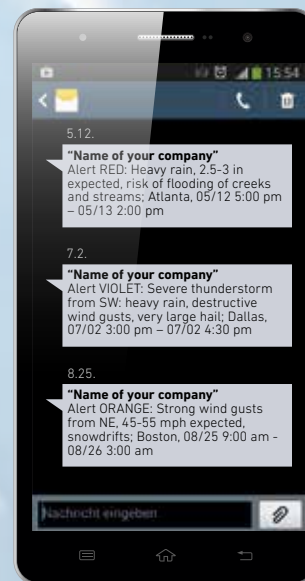

## CUSTOMIZATION

- You can decide who receives information and when, where, and how it is provided

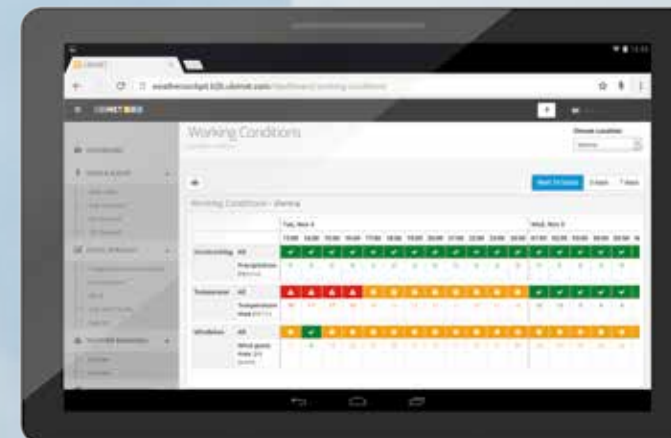

## LIVE WEATHER AND FORECASTS

- Live precipitation radar
- Lightning detection system powered by nowcast
- Point forecasts as a table and meteogram
- Animated forecast maps

## WARNINGS AND ALERTS

- Severe weather warnings sent by text message and e-mail before rain, snow, wind, thunderstorm, and freezing rain
- Customized precipitation, lightning, and wind alerts via text message

## PLANNING CALENDAR

- Notice regarding ideal working conditions
- Presented clearly in the calendar
- The customer sets the parameters, rules, and thresholds for required working conditions

## ADMINISTRATION

- Selection of location and user administration in the portal
- Save, send, and print reports
- Create warnings and alerts directly in the portal
