

# WEATHER-AUTOMATED AGROINSURANCE

DEFINING THE NEW ERA  
OF AGROINSURANCE

## YOUR CHALLENGES

### EVALUATE RISK TO AVOID PRODUCTIVITY LOSSES

### CALCULATE RISK-ADJUSTED AND RESPONSIVE PREMIUMS

### MANAGE EMBARGOES

### OPTIMISE TIMING OF AGRICULTURAL ACTIVITIES

## OUR SOLUTIONS

### WEATHER-AUTOMATED AGROINSURANCE

- Unlock new market potential
- Global turnkey solution
- Weather-relevant embargo planning
- Enable concluding agroinsurance contracts during crop cycles
- Weather-driven dynamic pricing models

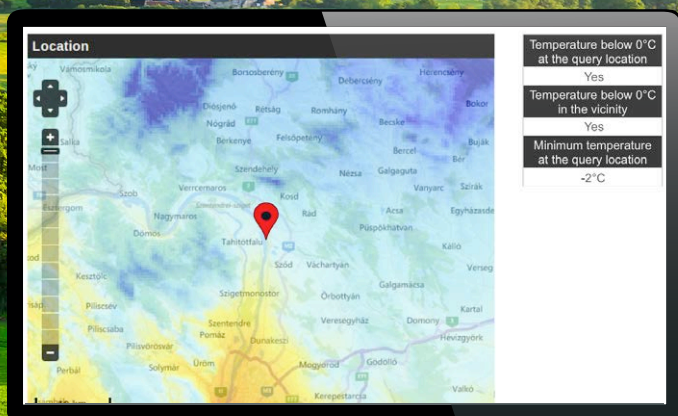

### WEATHER COCKPIT® AND SEVERE WEATHER WARNINGS

- Intuitive map-based web portal with forecasts, special agricultural parameters and archive
- Real-time weather data monitoring
- Overview of agricultural weather parameters e.g. saturation deficit, fire index, Growing Season Index (GSI), probability of frost/thunderstorm/hail...
- Insurance branded SMS and email warnings with different impact related warning levels
- Issued for wind, snowfall, rain, freezing rain, thunderstorms/hail etc.

# SOLUTIONS

## CLAIMS INFORMATION SYSTEM

- Accurate verification of weather-related losses
- Faster processing of individual claims
- Reduced costs for technical experts
- All parameters available including: lightning, wind, hail, rain, frost, drought
- Available via portal solution or RESTfulAPI

## REANALYSIS

- Based on long-term weather data
- Map-based tool with risk information
- Wind, rain, snow, thunderstorm, hail, frost and drought indices etc.
- Visualises areas with statistically high/low weather risk in high resolution
- Short- and long-term risk reanalysis

# YOUR BENEFITS

## EVALUATE RISK

- Assess risk based on long-term historical weather data
- Continuously monitor weather data to gauge risk
- Alert aggroinsurance to high-risk clients
- Establish long-term competitive advantage

## INCREASE EFFICIENCY

- Automate underwriting and claims handling
- Improve claims processing through weather-smart contracts
- Enable customers to increase efficiency with more precise planning
- Accurate weather claims forecast
- Efficient operational planning / staffing

## REDUCE COSTS

- Prevent fraud by blockchain verifying contracts with integrated weather data
- Ensure only valid claims are paid out based on highly precise weather information
- Prevent property damage and reduction of crop loss due to severe weather events
- Minimise losses or, ideally, avoid them entirely
- Evaluate faster, save time
- Reduce organisational and process costs

## MAXIMISE SALES

- Estimate crop yield by monitoring growing parameters
- Swiftly verify claims with clear results
- Reduce loss payment
- Optimise rejection rate and Combined-Ratio
- Create dynamic pricing based on actual risk

## INCREASE CUSTOMER LOYALTY

- Easy access to aggroinsurance via smartphone
- Positively perceived by the insured and strengthens customer loyalty
