

We actively take steps to reduce electricity consumption and minimize the environmental impact of our travel. Our procurement practices are guided by environmental considerations, ensuring that sustainability is a key factor in every purchase decision.

We foster environmental awareness among our employees and encourage them to act responsibly – both at work and in their personal lives.

Sustainability for us also includes a strong social component. We place great importance on ethical conduct, positive working conditions, and a sense of community within our team. Fairness and integrity guide our relationships with suppliers and customers alike.

Our environmental management system ensures that we regularly monitor and assess our environmental performance. This enables us to identify areas for improvement and adjust our priorities when necessary. In line with environmental regulations, customer expectations, and other relevant standards, we strive to continually improve our environmental impact.

Through our products, solutions, services, and research initiatives, we support other companies in becoming more environmentally sustainable.

We aim to lead by example and inspire our suppliers, customers, and partners to adopt similar environmental practices.
